ASBESTOS TAPE – TECHNICAL DATASHEET

Asbestos Tape is a high-temperature resistant insulation material made from high-quality chrysotile asbestos fibers. It is designed for wrapping, sealing, and thermal insulation of pipes, cables, and hot surfaces in industrial applications.

Parameter	Specification
Material	Asbestos
Thickness	3 mm
Width	3 Inches
Form	Tape / Roll
Temperature Resistance	325°C to 350°C
Color	White
Application	Thermal insulation & wrapping

Applications:
• Wrapping of water-cooled cables
• Insulation of pipelines
• Furnace and boiler insulation
• Protection of hoses and hot surfaces

ELECTRO POWER ENTERPRISE
